

Online Lead RRP Training!

The EPA Renovation, Repair and Painting (Lead RRP) Rule that took effect April 22, 2010 presents a new challenge to NLA members and your customers who work on pre-1978 housing. **The EPA has delayed enforcement until January 1, 2011 for remodelers who are enrolled in training by September 30, and complete the training by December 31, 2010.**

Meet this regulatory challenge by helping your customers and your own employees become Lead RRP certified in a convenient and cost-conscious way.

NLA is partnering with **ComplyAbility**, a Lawrence, Kansas-based training provider, to offer Lead RRP training that is 75% online and 25% hands-on, leading to EPA certification. NLA members can sponsor the hands-on portion of the training.

Benefits to you are:

- Your own installation employees and subcontractors will be Lead RRP certified so you can continue to offer installed sales for pre-1978 homes.
- Your builder and contractor customers will be Lead RRP certified so they can continue to work on pre-1978 homes, and you can continue to supply those projects.
- Companies sponsoring hands-on training will help their customers complete this certification. Your customers will thank you for taking leadership.

Online training for the first 6 hours has advantages:

- These hours can be inside or outside of regular business hours, your choice.
- Instant and permanent access to training manuals, so they can be reviewed at any time, and also required forms and brochures that must be distributed to homeowners.

Sponsoring hands-on training involves:

- Providing a venue-your conference room, or cooperate with other yards in the region to sponsor the training at a local community college or public library meeting room.
- Providing an assistant to the trainer to help with registration. This can be an employee or someone else.
- Two or even three 2-hour classes can be scheduled for one day, with a maximum of 20 students per session.
- Sponsors cover the trainer's travel and associated expense, but, ComplyAbility rebates the sponsor \$10 per student to help offset those costs. Again, cooperating with other yards in your region can help to distribute those costs.
- Each person who registers-including NLA members' employees and your customers who take the training-receives a \$20 discount by using the NLA promotional code. A flyer containing the code and a brochure are provided for you to send or give out to your customers.

ComplyAbility comes very well recommended by the Mid-America Lumbermens Association. NLA is excited to make this opportunity available. See the flyer that follows or contact ComplyAbility directly at (800) 708-6460 for more information.

Announcing

Lead-Safe Training – Now Available Online

We're proud to team with the Northwestern Lumber Association to bring you Lead-Safe Work Practices training online!

ComplyAbility is an EPA Certified provider of Online Lead-Safe Work Practices Training. Six (6) hours of online training is accompanied by two (2) hours of "hands-on" skills assessment.

Who is covered? Painters, Remodelers, Renovators, Contractors, Plumbers, Electricians, Roofers...

You must use Lead Safe Work Practices when working in child occupied facilities or homes built before 1978. To become RRP Certified, you MUST receive training from an Accredited Training Provider!

"Hands-On" classes are scheduled at locations as convenient to you as possible. You must sign up for a hands-on training class in advance by responding to an email you will receive upon completion of the online portion of the training. Bring your "Online Training Completion Certificate" with you to gain admittance to the hands-on training.

The online price is ~~\$195~~ per person. Your cost, however, is just \$175. Use the Promotional Code: **NLM5B** when you register to receive the discount.

Take mandated Lead-Safe Work Practices training when it's convenient for you.

- No sitting in uncomfortable chairs, in stuffy rooms, daydreaming or thinking about what you have to do when you return to work.
- You learn in a non-stressful environment because you have control over your training experience.
- **No taking time away from your business and no lost income as a result.**
- Instant access to training manuals, required forms, brochures (Renovate Right pamphlet that you must distribute, etc.),
- Plus permanent access to these materials.
- There are many additional benefits to Online training!

Act Now to Avoid Stiff Financial Penalties!

All EPA forms, manuals and other materials are permanently accessible via the ComplyAbility LeadSafeOnline system...Licensed Firm & Renovator Application, Training Verification Record, RRP Rule Handbook, On-the-Job Training Verification Form, and more.
